

Care burden rise as mothers support with remote learning during the pandemic

Oct-Nov 2020, UNDP UNICEF PROSPERA SMERU did a survey to identify the impacts of COVID-19 on households conditions

☐ The survey was a **nationally representative survey** with a total sample of 12,216 households

Main carer supporting children with remote learning during COVID-19 (by HH with school-age children)

Half of the respondents were also doing paid work

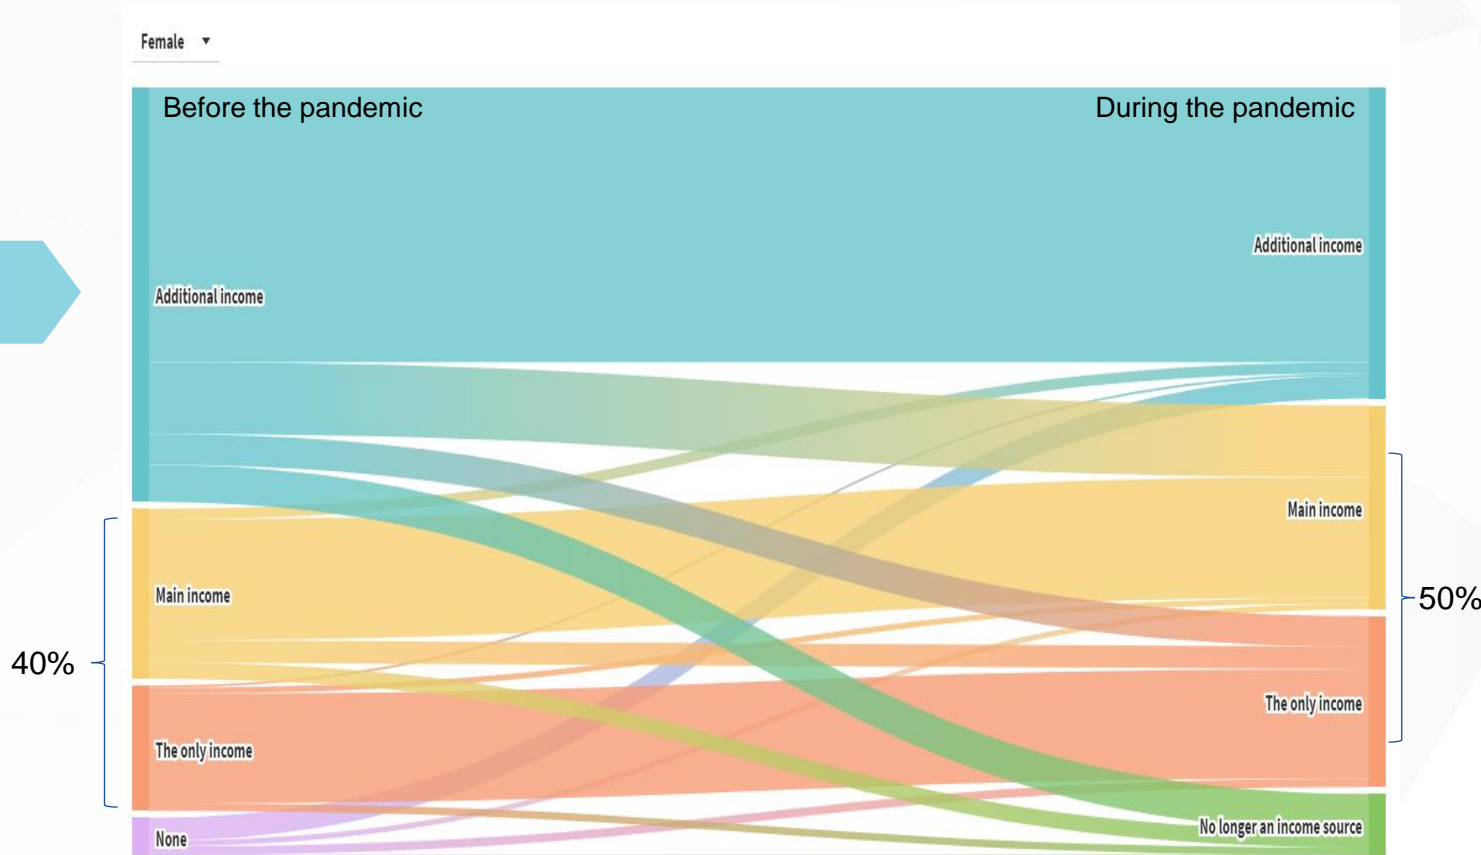

Women microbusiness in Jakarta face higher economic and domestic workload

A higher proportion of women respondents now say their business income is main source of income or the only source of income for their families

Dec 2020-Feb 2021, Jakpreneur-Prospera did a survey to identify the impacts of COVID-19 on microbusiness in Jakarta and the support needed by female microbusiness owners.

- The survey was representative to 155,000 Jakpreneurs, **2/3rd of them are women.**

30% have under 5 children
40% have primary school age children
